

FlipPad™

The Antimicrobial Rugged case for the iPad® Air 2 & 9.7in Pro

Water Resistant & Resistant to Chemicals

Water resistant to IP65 the FlipPad has an internal Ceracon seal that allows no ingress of fluid after external spraying. With FDA compliant materials, the FlipPad can be cleaned repeatedly with the harshest cleaning chemicals (3000ppm Bleach) and with a wipe clean design it can be cleaned and dried quickly.

Drop Resistant

With impact resistant corners and inner cradle, the FlipPad survives the knocks and drops life throws at it, keeping your iPad safe and secure.

Antimicrobial Corning® Gorilla® Glass Screen

A clean, tough cover glass made possible by embedded ionic silver with antimicrobial performance that lasts through the lifetime of the touch display.*

Versatile Rear Stand

Designed to work for you, the FlipPad grips any surface in portrait or landscape and folds flat for typing. The FlipPad is designed to be comfortable to hold and clamps onto hospital bedrails.

*Antimicrobial Corning® Gorilla® Glass does not protect users or provide any direct or implied health-benefit.

Dimensions:	288(L) x 215(H) x 22(D) mm [including handle depth is 74mm].
Weight:	Under 700g without an iPad®.
Material Approvals:	All external materials are FDA approved/compliant.
Antimicrobial Corning® Gorilla® Glass Screen:	<ul style="list-style-type: none">- A clean, tough cover glass made possible by embedded ionic silver with antimicrobial performance that lasts through the lifetime of the touch display.*- The first antimicrobial cover glass to obtain US EPA registration.*
Water Resistance:	Water resistant to IP65, this includes zero dust ingress and zero water or chemical ingress after being sprayed by jets for 30 minutes.
Scratch Resistance:	Corning Gorilla Glass has up to 2x better damage resistance than competitor glass and many times more resistance than competitor plastic screens to daily scratches and accidental damage from keys or equipment. Screen remains brilliantly clear long after plastic screens mark and fade leaving iPad screen obscured and unusable.
Screen Sensitivity:	Screen sensitivity remains high, even when used with surgical gloves.
BYOD Ready:	Install the iPad® in under 3 seconds! No tools required.
Secure Kensington Lock:	Lock your FlipPad to an immovable object with the integrated 316 Stainless Steel Kensington lock. Fits all standard Kensington Branded locks.
Connectivity:	No loss of 4G , Wi-Fi or Bluetooth connectivity.
Power Charging:	Fits all standard Apple® Lightning, VDU, HDMI cables etc. No adapters required.
Camera Lens:	Corning Gorilla Glass Lens maintains brilliant, clear, unobscured vision from both front and rear cameras. Please test if the flash function on the iPad pro is required, as minimal optical refraction has been observed.

The FlipPad is covered by a 12 month warranty. Please register at - www.futurenova.com/contact-us
FutureNova are a UK based company which designs advanced technology products. We specialise in International Healthcare and medical design services, with offices in the UK, Europe and the USA.
